Oswaldo Cruz Foundation, Brazil - FIOCRUZ

Oswaldo Cruz Foundation (Fiocruz), a Brazilian federal strategic health research institution, is publicizing the Special Call among its researchers and mobilizing the Fiocruz community to submit proposals in collaboration with Canadian researchers.

Also, Fiocruz is committed to providing a supplemental funding of \$10 thousand/year (total of \$20 thousand) to Fiocruz research groups involved in winning projects, to support eventual travel expenses (to connect Brazilian and Canadian researchers) or/and local fieldwork, according to criteria to be detailed in separate guidelines.

Finally, Fiocruz will release an independent internal Research Call based on the UN Research Roadmap for the COVID-19 Recovery, focusing on some priority areas (budget and criteria are under analysis).

Education at Fiocruz: strategic goals

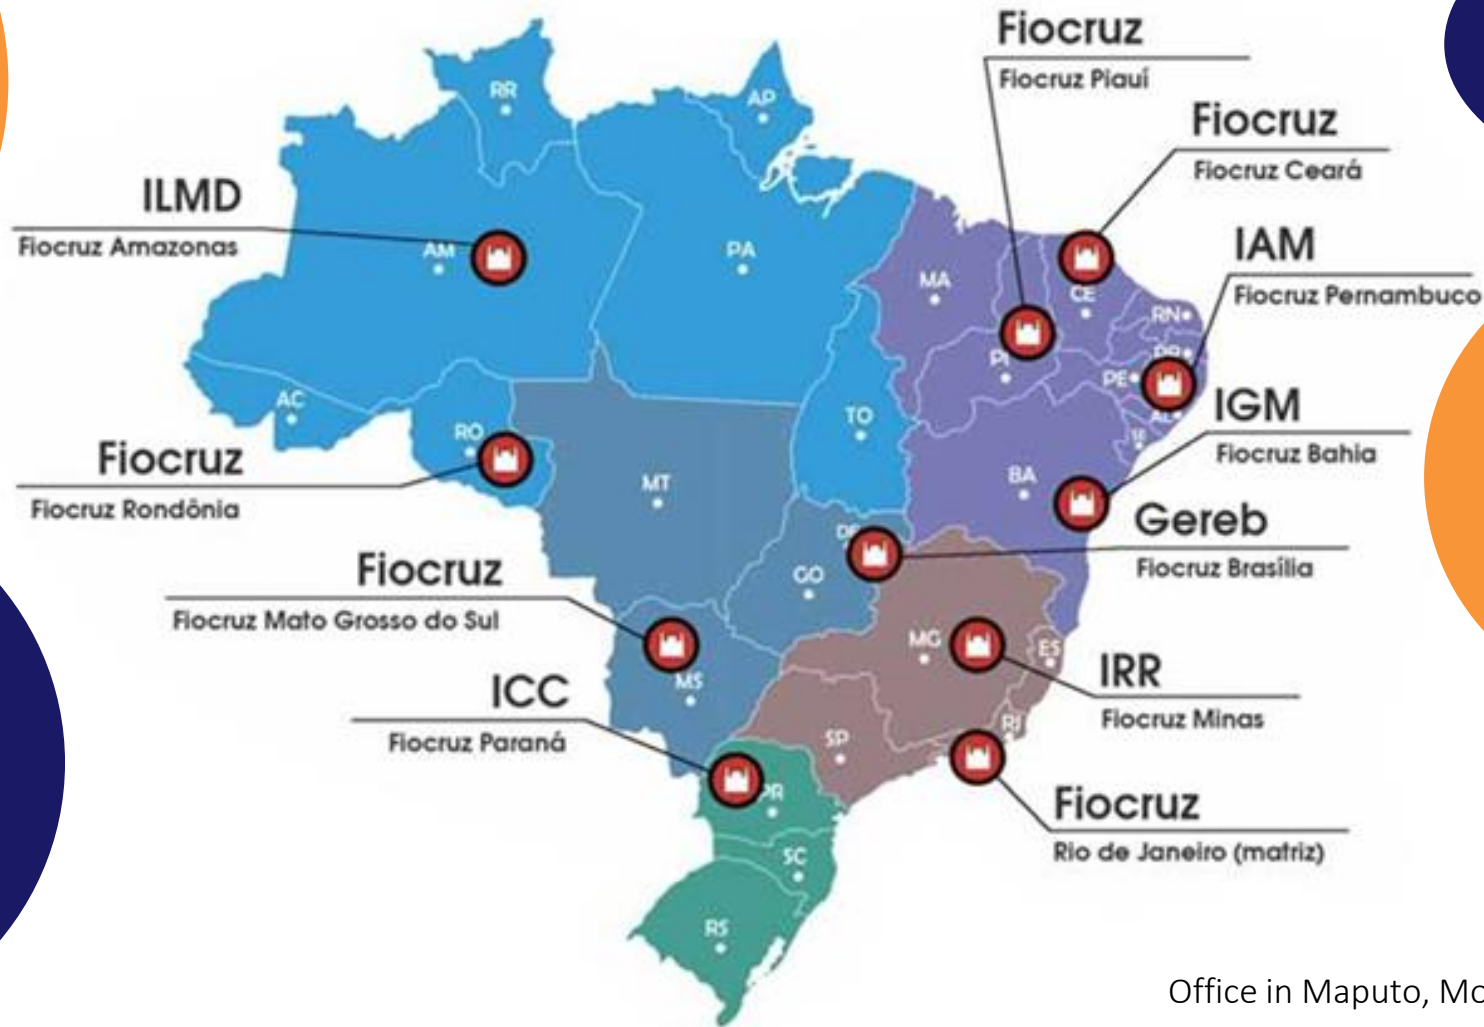

Science, Technology and Innovation for the Unified Health System (SUS)

Coordinating research, teaching, and public engagement in science

National and international cooperation

Reducing inequalities in health, education and science

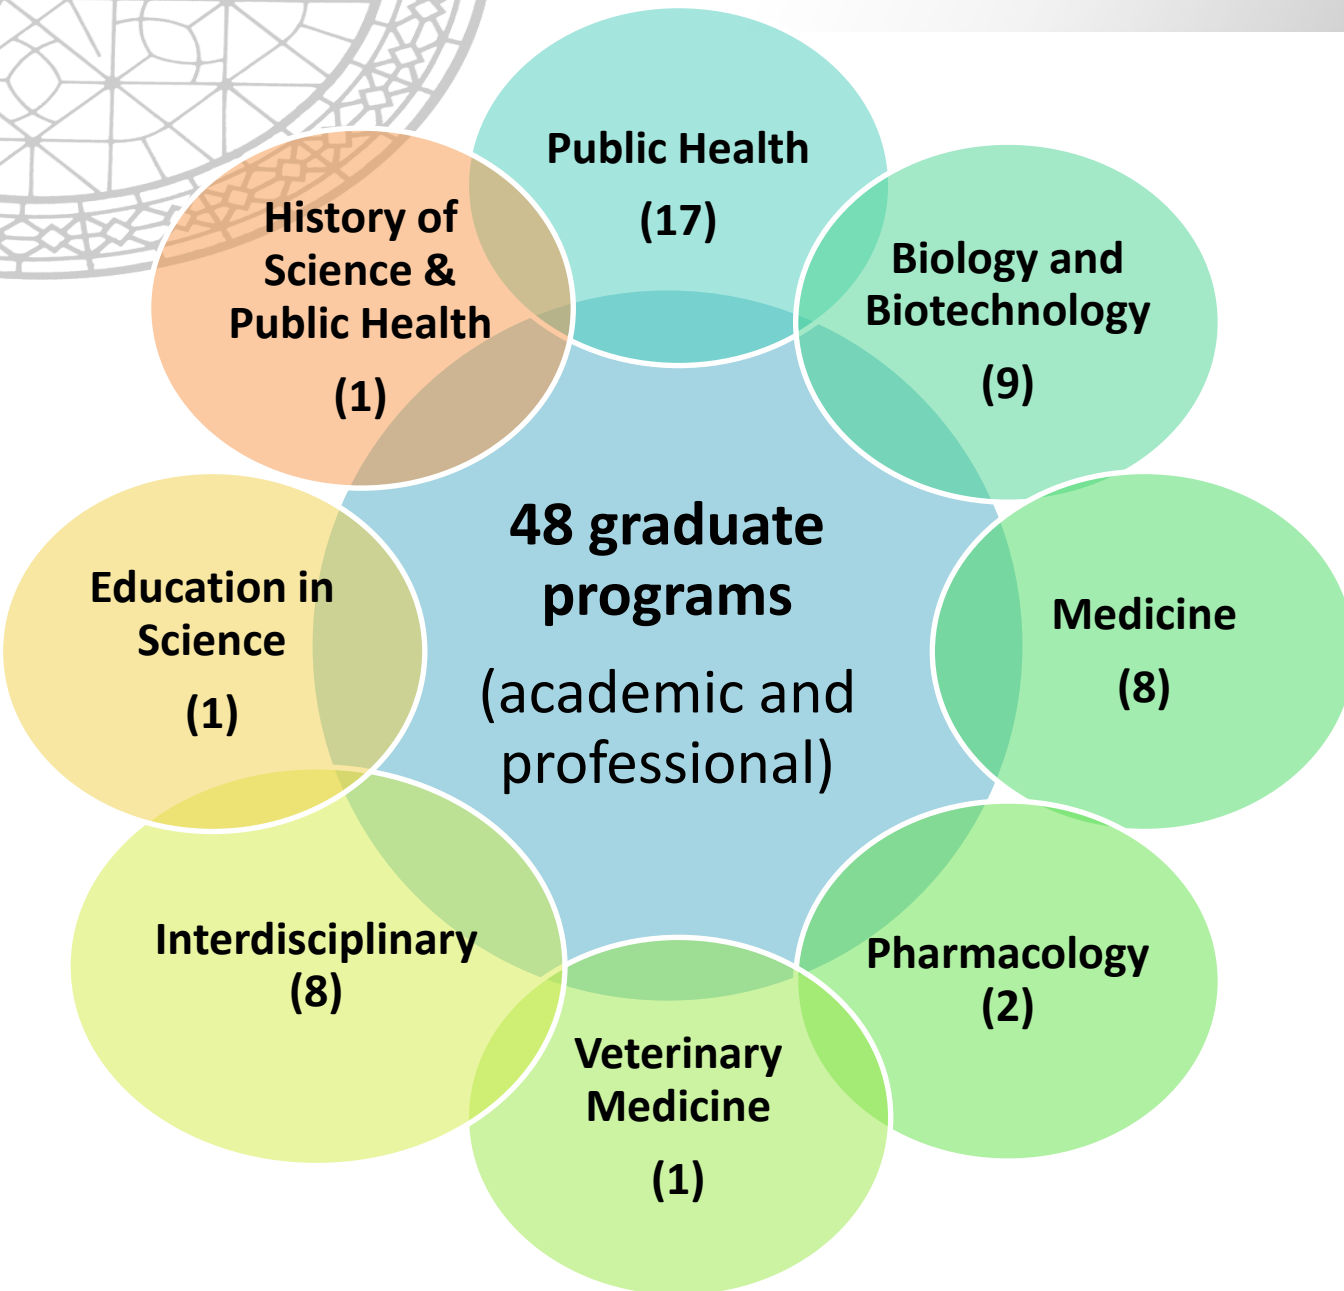

Fiocruz Units

Office in Maputo, Mozambique

Education in numbers

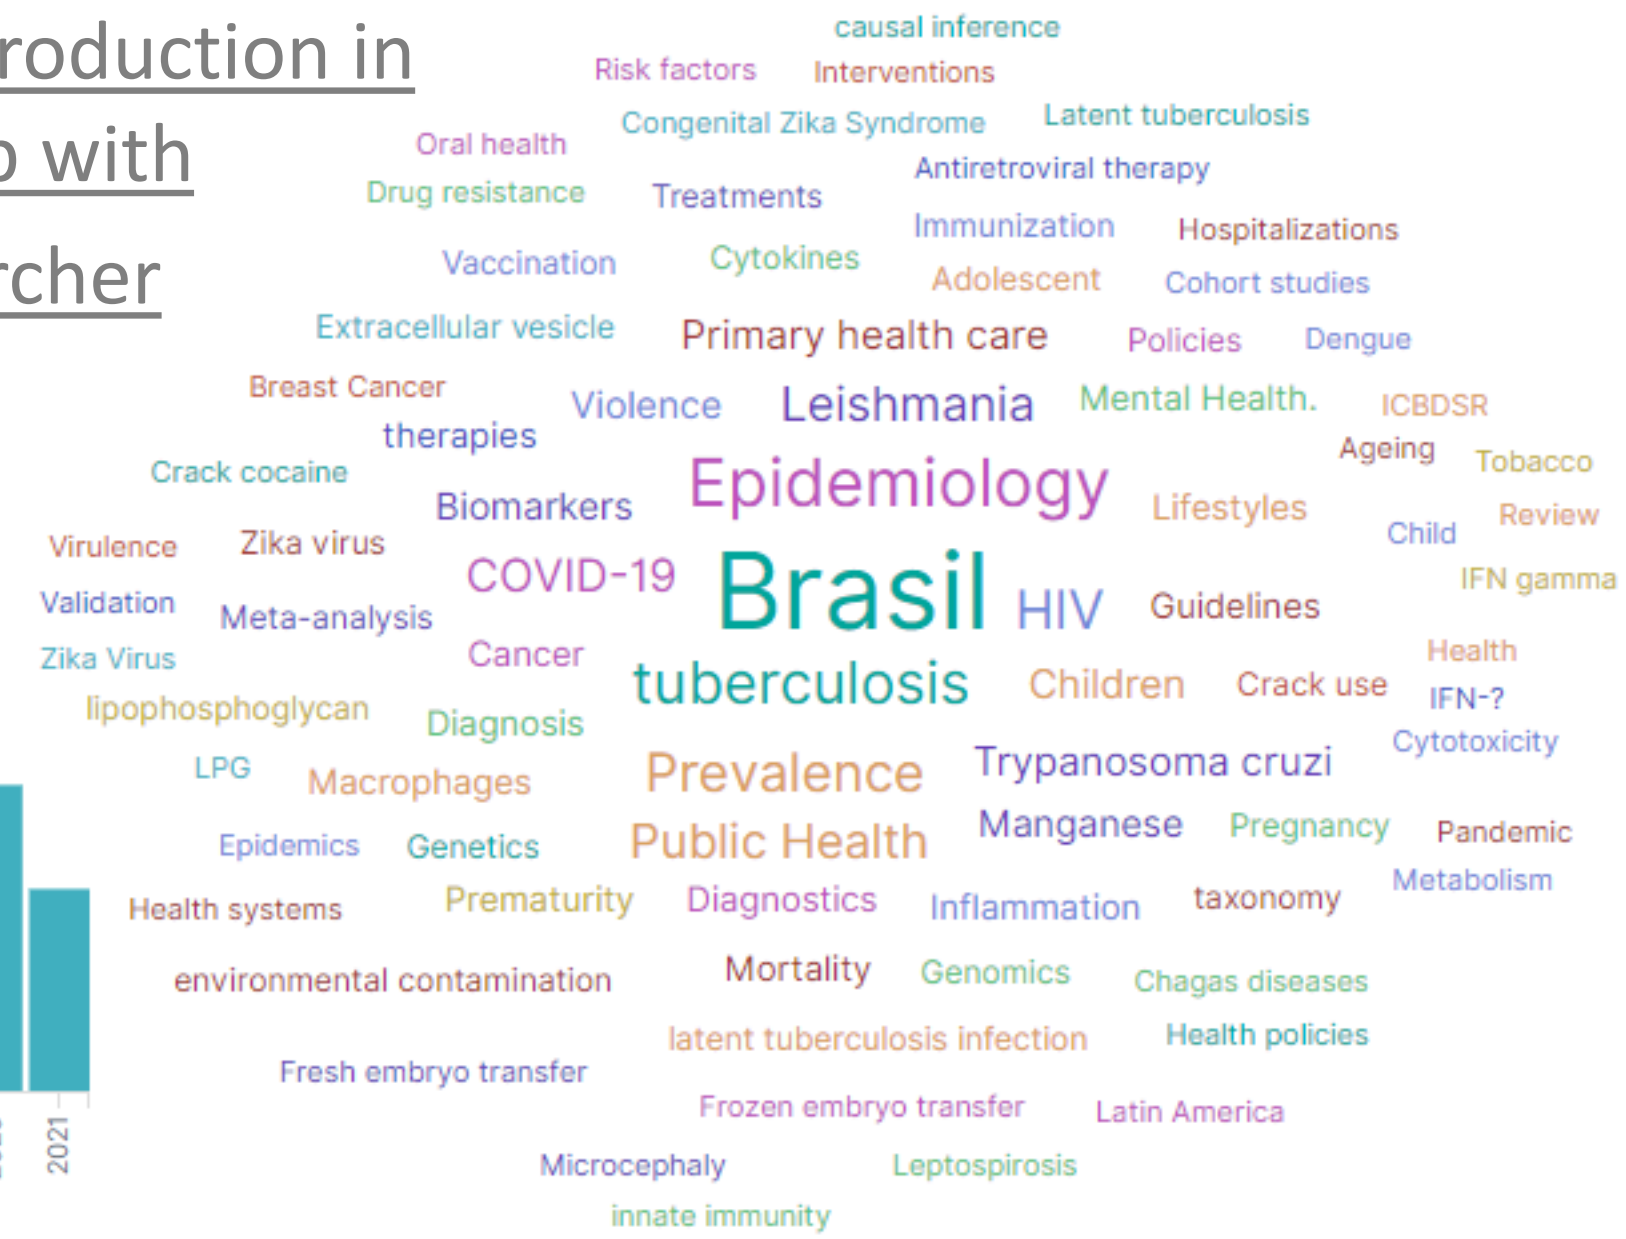

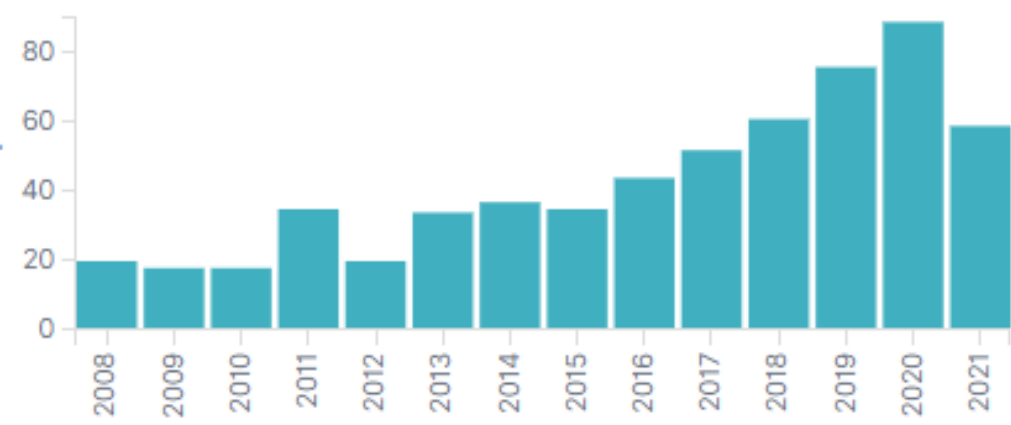

Major Subjects

Primary Health Care	Health Systems' Management	Epidemiology
Environment and Social Determinants of Health	Infectious Diseases, Chronic Diseases	Biotechnology (vaccines, drugs)
Women's and Children's Health	Science, Technology and Innovation	Information and Communication in Health

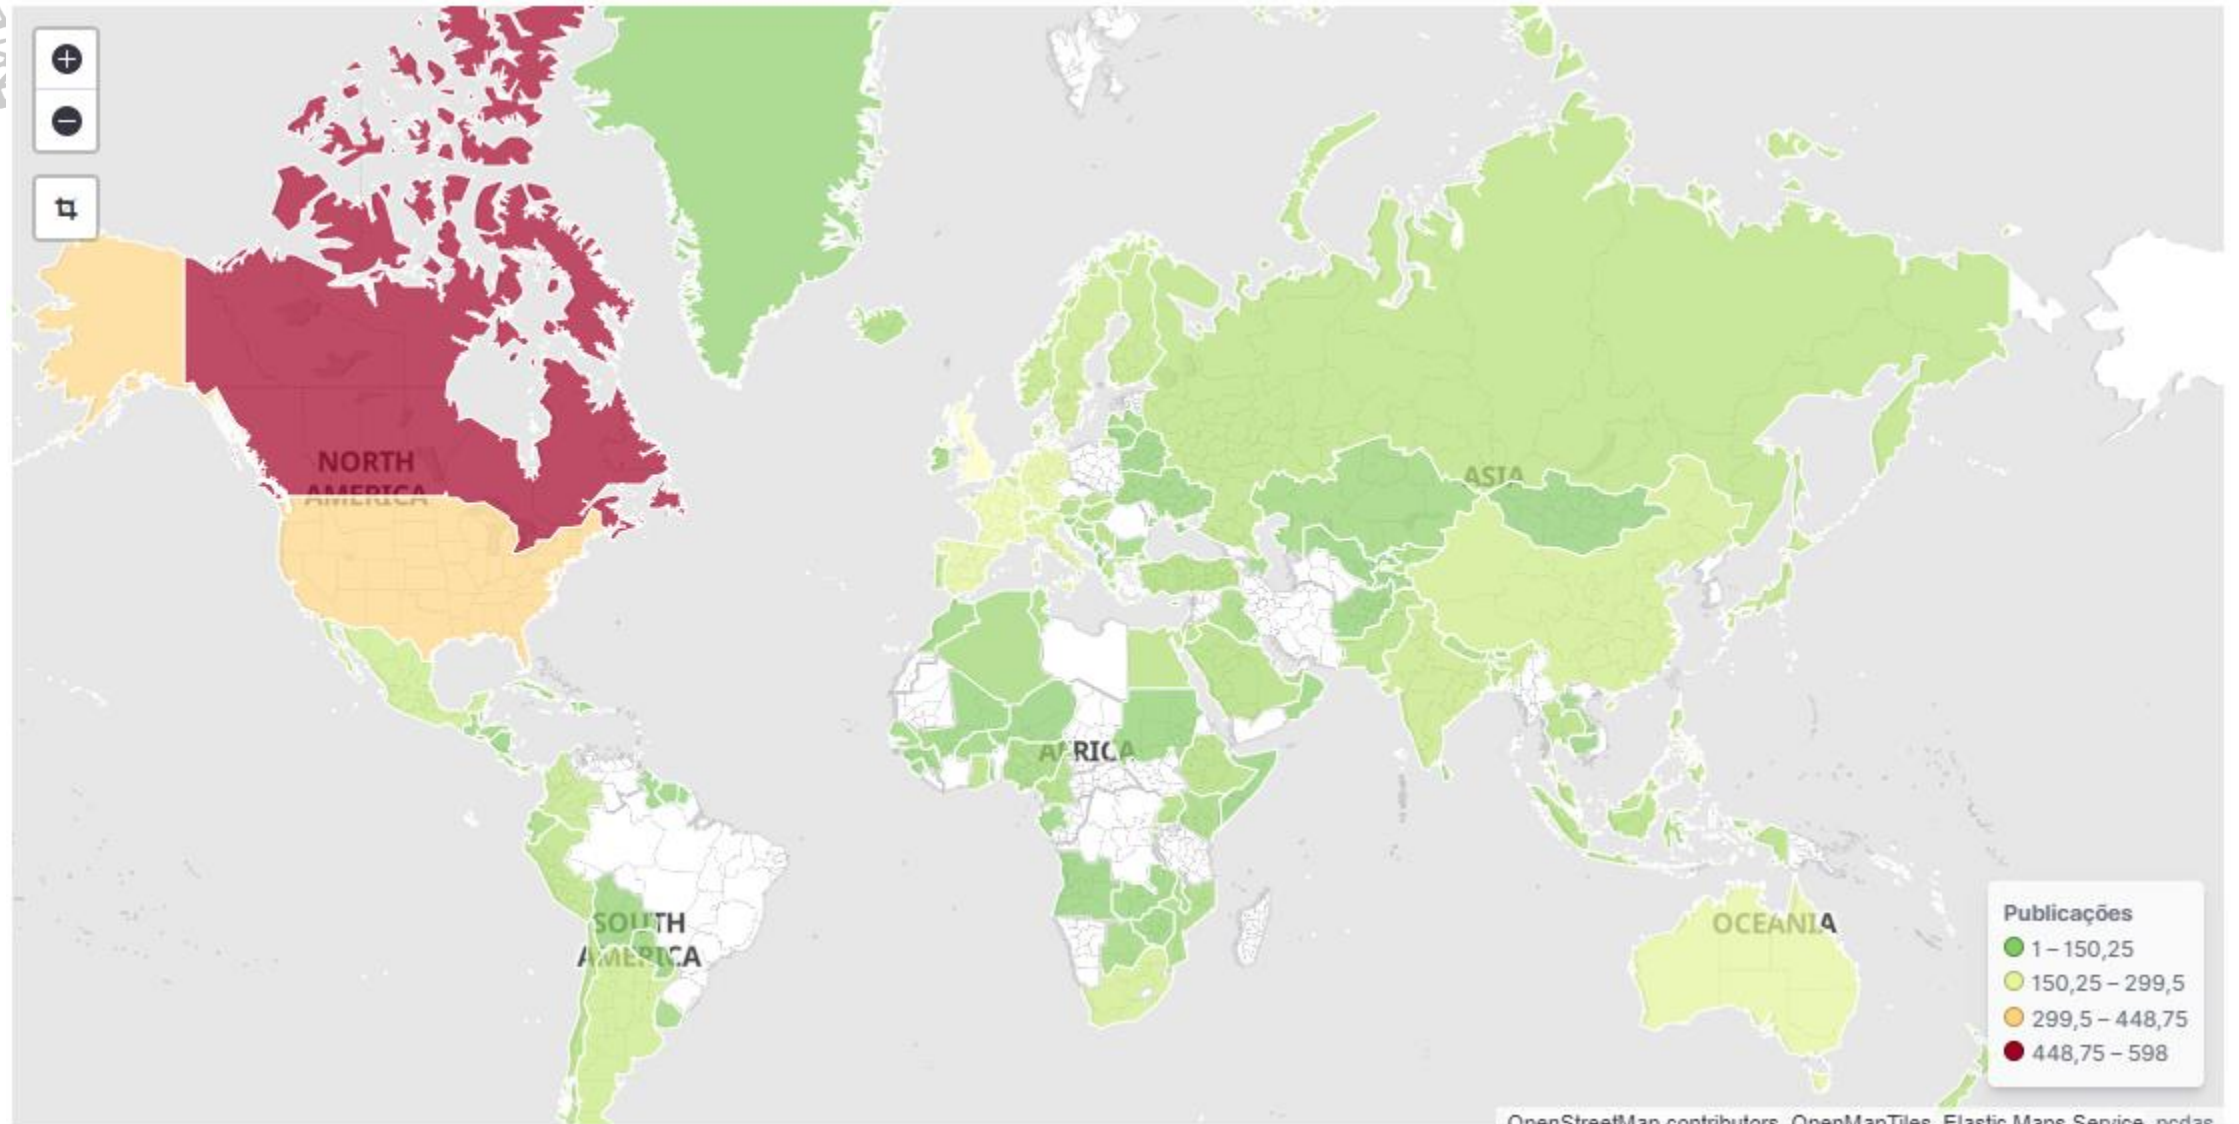

Scientific production in partnership with Canadian researcher (2008-2021)

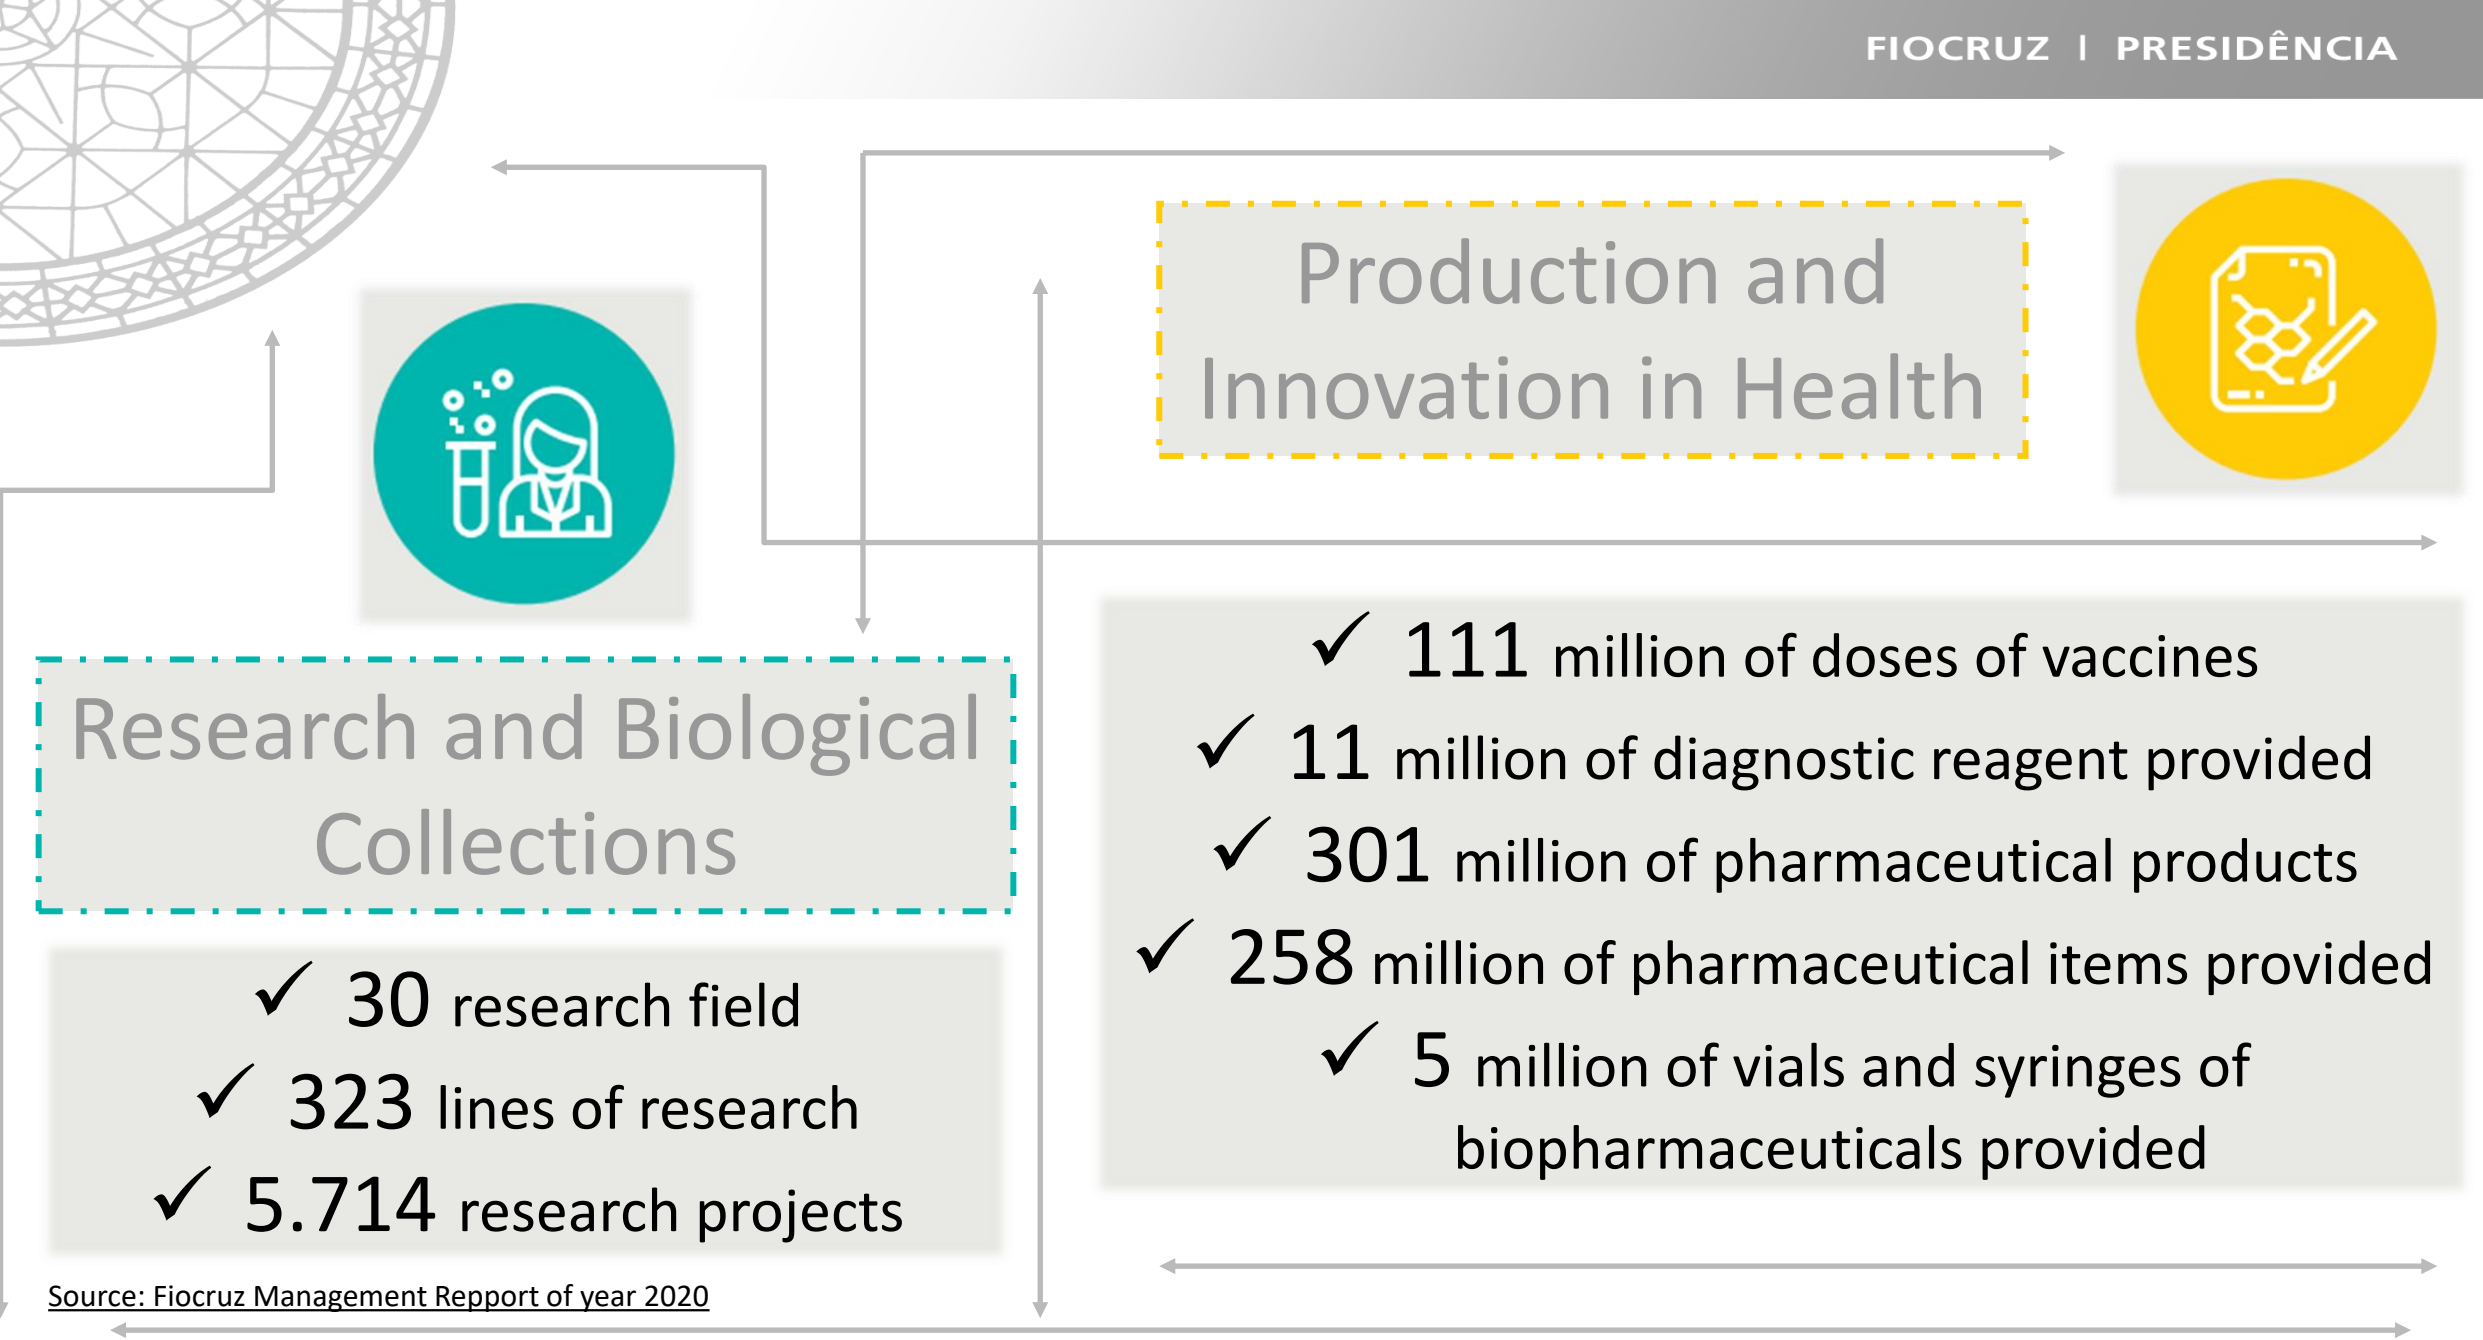

Total of publication **598**

Scientific production (2008-2021)
international partnership (co-authorship in publication)

OpenStreetMap contributors, OpenMapTiles, Elastic Maps Service, ncda

Research and Biological Collections

- ✓ 30 research field
- ✓ 323 lines of research
- ✓ 5.714 research projects

Production and Innovation in Health

- ✓ 111 million of doses of vaccines
- ✓ 11 million of diagnostic reagent provided
- ✓ 301 million of pharmaceutical products
- ✓ 258 million of pharmaceutical items provided
 - ✓ 5 million of vials and syringes of biopharmaceuticals provided
